

Clicker5

Cell Properties

To open “Cell Properties”

In Edit Mode, right click (Mac – Ctrl+click) on the cell and click on Properties.

Appearance Tab

You can change the format of the text – alignment, font size, font color.

You can change the background color or make a cell transparent.

You can choose or remove a picture and change the position of a picture.

Send Tab

In this tab you can decide what will be sent when the cell is selected – no text, text in the cell, alternative text, picture.

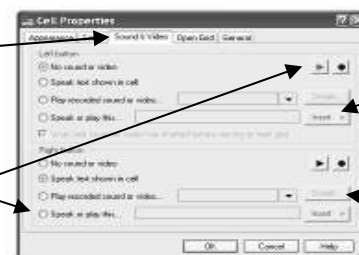

You can have text from a different cell or textbox sent when the cell is selected.

You can add a space, return, or tab to the end of the text.

Sound & Video Tab

In this tab you can decide what sound or video will be played when the cell is selected.

You can record speech or enter text to be spoken.

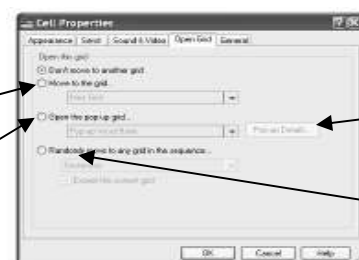

You can insert text from another cell to be spoken when this cell is selected.

Click on Details to change video to full screen.

Open Grid Tab

In this tab you can assign different actions to cells when they are selected.

Cells can move the user to a specific grid or open pop-up grids.

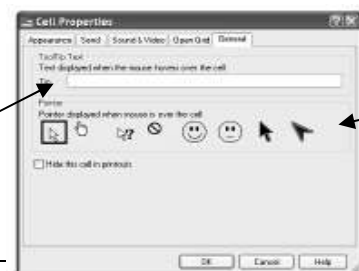

Use pop-up details to determine how the rest of the grid works when the pop-up is open.

Cells can move the user to a random grid.

General Tab

You can add a tooltip which will appear when you move the mouse over the cell.

You can assign a special pointer to be displayed when you move the mouse over the cell.
